

# Northern Hard Maple

**Chelsea Plank Flooring**  
Manufactured By Frame Hardwoods, Inc. In Chelsea, Michigan

Northern Hard Maple offers a very smooth, light grain appearance that furniture designers often compliment with Walnut and Cherry. Dense and hard, Northern Hard Maple is often used in the manufacture of butcher blocks and machine pads, thus making it an exceptional specie for hardwood plank flooring.

Northern Hard Maple should not be confused with Soft Maple species like Silver Maple, Red Maple or Pacific Coast Maple. Soft Maple is very soft, roughly the same hardness as Southern Yellow Pine, and dents easily.
